

## Year 2 Comprehension 18: The Weather Watchers

Once upon a time in a cozy little town, there were four best friends named Mia, Sam, Lily, and Ben. They were known as the Weather Watchers because they loved observing the weather and predicting what it would be like each day. One sunny morning, the Weather Watchers gathered at their secret clubhouse, which was a treehouse hidden in the park. They had colorful binoculars, rain gauges, and a special weather chart.

Today, their mission was to predict the weather for the town's big picnic. Mia looked through her binoculars and exclaimed, "I see fluffy white clouds and a bright sun! It's going to be a warm day." Sam checked the wind using a windsock and added, "The wind is blowing gently, so our picnic won't have any flying napkins!" Lily measured the humidity and said, "The air feels a bit damp, but I don't think it will rain." Ben, holding a thermometer, reported, "The temperature is just right for a picnic. Not too hot and not too cold."

With their observations, the Weather Watchers decided to tell everyone that the picnic would be a perfect day for outdoor fun. As they enjoyed the picnic, Mia, Sam, Lily, and Ben were proud of their accurate weather predictions. From that day on, the Weather Watchers became even more popular, helping their town prepare for all kinds of weather. They learned that working together and using their special tools could make every day a safe and enjoyable one. And so, their adventures continued, making their town a happier and more weather-ready place to be.

## Multiple Choice Questions

1. What are the names of the four best friends in the story?

- a) Jack, Emma, Liam, Sophie
- b) Mia, Sam, Lily, Ben
- c) Max, Olivia, Ethan, Ava
- d) Lucas, Chloe, Noah, Emily

2. What do the friends like to do in the story?

- a) Play video games
- b) Watch movies
- c) Observe the weather
- d) Go shopping

3. Where is the Weather Watchers' secret clubhouse located?

- a) A library
- b) A beach
- c) A treehouse in the park
- d) A school

4. What tools do the Weather Watchers use to observe the weather?

- a) Colourful binoculars, rain gauges, and a weather chart
- b) Pencils, erasers, and notebooks
- c) Bicycles, skateboards, and rollerblades
- d) Cameras, phones, and tablets

---

---

---

---

7. What did Mia, Sam, Lily, and Ben do at the picnic?

---

---

---

---

8. How did the Weather Watchers help their town after the picnic?

---

---

---

---

9. What lesson did the Weather Watchers learn from their adventures?

---

---

---

---

10. Where did the Weather Watchers make their predictions from?

---

---

---

---

# Answer Key

## Multiple Choice Questions

1. b) Mia, Sam, Lily, Ben
2. c) Observe the weather
3. c) A treehouse in the park
4. a) Colourful binoculars, rain gauges, and a weather chart
5. c) To predict the weather for the big picnic
6. a) Fluffy white clouds and a bright sun
7. c) By checking a windsock
8. c) Humidity
9. d) It would be a perfect day for outdoor fun
10. b) Working together and using their tools can help make every day safe and enjoyable

## Short Answer Questions

1. Ben used the thermometer to measure the temperature.
2. The Weather Watchers predicted a warm and sunny day for the town's picnic.
3. According to Lily's observations, the air felt a bit damp but not like it would rain.
4. The wind was blowing gently, so the Weather Watchers thought that there wouldn't be any flying napkins at the picnic.
5. The Weather Watchers learned that working together and using their special tools could help them make accurate weather predictions.
6. The outcome of the town's big picnic was a perfect day for outdoor fun as predicted by the Weather Watchers.
7. At the picnic, Mia, Sam, Lily, and Ben enjoyed themselves and were proud of their accurate weather predictions.
8. The Weather Watchers helped their town by preparing them for various types of weather, making their town a happier and safer place.
9. The Weather Watchers learned that teamwork and using their special tools could make their town better prepared for different weather conditions.
10. The Weather Watchers made their predictions from their secret clubhouse, which was a treehouse hidden in the park.
